GEODERMA

Contents Volume 85, 1998

Variation in soil surface area in a chronosequence of soils from Glen Feshie, Scotland and its implications for mineral weathering rate calculations
M.E. Hodson, S.J. Langan, F.M. Kennedy and D.C. Bain 1

Laboratory evaluation of a proximal sensing technique for simultaneous measurement of soil clay and water content
R.A. Viscarra Rossel and A.B. McBratney 19

Assessment of weathering rates in Dutch loess and river-clay soils at pH 3.5, using laboratory experiments
C. van der Salm, L. Köhlenberg and W. de Vries. 41

Changes in microstructure, voids and b-fabric of surface samples of a Vertisol caused by wet/dry cycles
J. Hussein and M.A. Adey 63

A comparison of EM induction and GPR methods in areas of karst
J.A. Doolittle and M.E. Collins 83

A procedure to derive land quality indicators for sustainable agricultural production
J. Bouma and P. Droogers 103

Preface 111

Incorporating scale into spatio-temporal variability: applications to soil quality and yield data
M.R. Hoosbeek 113

Aggregation and interaction issues in statistical modeling of spatiotemporal processes
N. Cressie. 133

Spatiotemporal information systems in soil and environmental sciences
G. Christakos 141

Spatial autoregression modeling of site-specific wheat yield
D.S. Long. 181

Defining threshold values for residual soil N levels
A. Verhagen and J. Bouma. 199

Stochastic imaging of soil parameters to assess variability and uncertainty of crop yield estimates
Y. Pachepsky and B. Acock 213

Spatial variability constraints to modeling soil water at different scales
M. Seyfried 231

Rates of weathering and chemical depletion in soils across a chronosequence of Lake Michigan sand dunes
J. Lichter 255

Soil chemical and physical properties as indicators of sustainable land management under sugar cane in Papua New Guinea
A.E. Hartemink. 283

Use of a fractal model for determining soil water retention curves
V. Comegna, P. Damiani and A. Sommella 307

Mercury contamination in sandy soils surrounding an industrial emission source (Estarreja, Portugal)
M.M. Inácio, V. Pereira and M.S. Pinto 325

Soil N biochemical diversity and numerical taxonomy as tools in the pedogenetic study of a fossil profile
J. Abadín, S.J. González-Prieto and T. Carballas 341
SEM observations in the back-scattered mode of the soil–root zone of *Brassica napus* (cv. Rafal) plants grown at a range of soil pH values
P. Adamo, W.J. McHardy and A.C. Edwards 357
Isoelectric point of soils determined by the diffusion potential method
M.C. Lamas and R.M. Torres Sánchez 371
